

t too small

$t = 0.34$

$\beta_0 = 12, \beta_1 = 0$

t about right

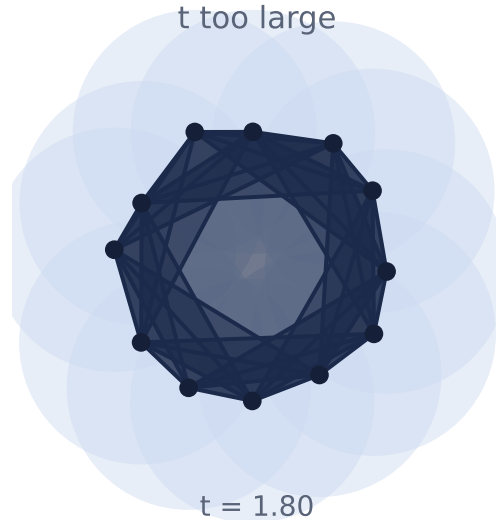

$t = 0.72$

$\beta_0 = 1, \beta_1 = 1$

only this one shows the real structure — and nothing in the data tells you where it is

t too large

$t = 1.80$

$\beta_0 = 1, \beta_1 = 0$
